

Sodium Sulfate

disodium sulfate | CAS 7757-82-6

Product identification

Product name	Sodium Sulfate
Chemical name	disodium sulfate
CAS number	7757-82-6
PubChem CID	24436
Molecular formula	Na ₂ SO ₄
Molecular weight	142.04 g/mol
InChIKey	PMZURENOXWZQFD-UHFFFAOYSA-L
Material type	Chemical reference material / technical compound

Material description

Sodium Sulfate is a inorganic sulfate salt supplied by Rexar as a chemical reference material / technical compound.

Intended use

For laboratory, analytical, chemical and method-development applications. Not for human or animal consumption. Not intended for food, supplement, cosmetic, medical, diagnostic or therapeutic use.

Reference characteristics

Structural class	Inorganic sulfate salt
Typical physical form	Solid / powder
Storage guidance	Keep tightly closed, dry and protected from light unless lot-specific supplier documentation states otherwise.

Analytical use and traceability

Lot-specific purity, water content, residual solvents and analytical acceptance criteria must be taken from applicable supplier documentation or a certificate of analysis; they are not inferred by this datasheet.

Safety note

PubChem's primary hazard summary lists anhydrous sodium sulfate as Not Classified. Confirm grade-specific information against the supplier SDS.

Identity verification note

Identity data were rechecked for this revision. Where a field could not be established reliably from the reviewed sources, it has deliberately not been invented and should be reconciled against lot-specific supplier documentation.

Document control

Document	Rexar Technical Compound Datasheet
Revision	10 September 2026

Status	Reference information; not a certificate of analysis
--------	--

Disclaimer

This document is provided for chemical identification and laboratory reference purposes. It does not certify batch purity or replace lot-specific analytical documentation.
